

## Heroic City, Reborn for New Glories

Wuhan, the capital city of Hubei Province. A **Modern Metropolis** with time-honored **history of over 3000 of years and brilliant culture** is renowned for its talented people and beautiful landscape including lots of Scenic and Historic Interest such as Yellow Crane Tower, Gu QinTai, East Lake, etc.

Wuhan is the **largest city in central China**, with the area of over 8000 square kilometers and a population of over 10 million people. It is also a university city with the **largest number (1 million) of college students in the world**. In recent years, Wuhan held a series of high-level international conference & activities, and hosted to visiting political leaders and dignitaries of many countries. **All the development and achievements of Wuhan are gaining attention all over the world.**

Before the Chinese New Year in 2020, Wuhan became the central battlefield in China fight against the covid-19 virus. Under the strong leadership of the CPC Central Committee with Comrade Xi Jinping at its core, Wuhan put life and the people above everything else and took the challenge head-on. We raced against time, wrestled hard with the ferocious virus. Wuhan emerged from it victorious, with heroic courage and great resilience. Now, **Wuhan is one of the safest cities in the world, which is backing in business and reborn for new glories.**

## Wuhan Textile University, a beautiful & open university in Wuhan, China

Located in Wuhan, Wuhan Textile University (WTU) is a fascinating and increasingly popular place to study in China. The history of Wuhan Textile University can be traced back to the establishment of Wuhan Institute of Textile Engineering in 1958. With rapid and continuous growth for over 60 years, it has developed into a famous comprehensive university with brilliant features in the field of Textile & Fashion.

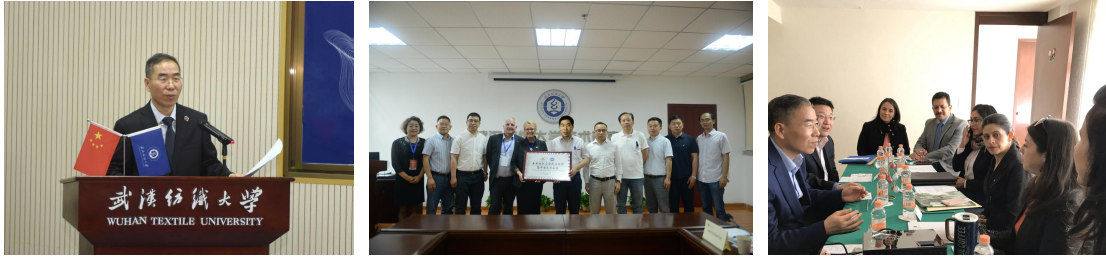

- 4 campus occupying an area of 130-plus hectares
- 20 schools
- 67 undergraduate programs

- 49 graduate programs
- 5 joint Ph. D. programs
- 1000+ professors
- 20000+ students
- 100+ students clubs

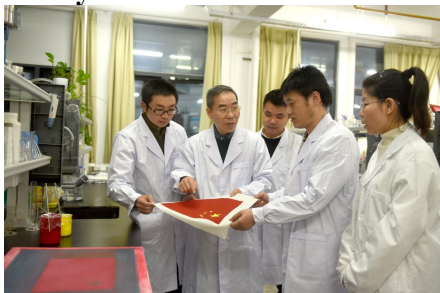

We pay much attention to strengthening international exchanges and established cooperative ties with over 100 universities and research institutes and cultivated over 600 high-level International graduate students. **“The Belt and Road” Initiative proposed by the state opens a new window** for WTU in working with more international partners. We have been conducting cooperative education programs of undergraduate level with University of Manchester, U.K., and Bunka Gakuen University, Japan. The establishment of **Birmingham Institute of Fashion and Creative Art (BIFCA)**, a partnership program with Birmingham City University of U.K. in 2016, is the first undergraduate-level institute of Sino-foreign cooperative education in Hubei Province. We have also been jointly conducting programs of cultivating doctoral students with universities in Australia, the United States, Russia, and Czech Republic. We have long been undertaking the international seminars themed **“Service Trade for Developing Countries” jointly sponsored by Ministry of Commerce, PRC, and United Nations Conference on Trade and Development.** For consecutive years, WTU has made steady progresses in international communications by sponsoring and organizing different types of large-scale international academic conferences, such as **89<sup>th</sup> Textile Institute World Conference (TIWC) in 2014**, which is the highest level conference in the textile area. We are:

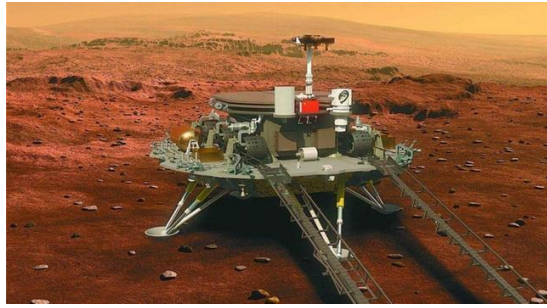

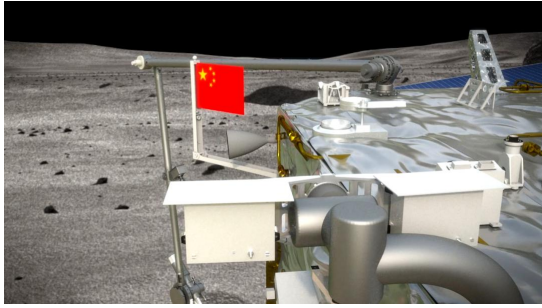

- first Chinese mainland member of Autex in Europe
- the council member of TI in U.K & Chinese Office of TI
- the Fiber Society in U.S.
- regional cooperative university of China-CEEC (17+1) Higher Education Institutions Alliance
- council institute of the Belt and Road Alliance of Textile Higher Education
- the university with the cultivation task for CSC Chinese Government Scholarship students
- construction institute of Research Institute of International People-to-People Exchanges for Textile Industry

**Wuhan Textile University, a university with strong scientific research power**

**China Change' e - 5 Fabric National Flag and Tianwen – 1 High Temperature Resistant Elastic Sealing Device Developed By WTU Scientific Research Team Led by President Xu Weilin**

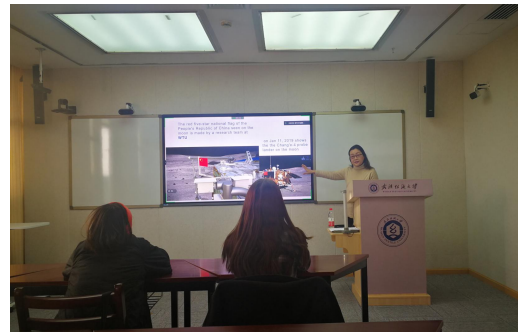

WTU attaches great importance to technological innovation for fostering key outcomes in scientific research. In this way, we aim at promoting transformation of these outcomes and incessantly scaling up our competitiveness in science and technology. **Blessed with a strong competitive edge in scientific research, WTU is taking the lead in the world level in domains such as textile technology, fiber material, creativity and design, and smart manufacturing.** It's the cradle of an array of cutting-edge research findings, which foster the transformation of textile production modes, and the innovation and upgrading of key technologies. We have:

- 5 national key laboratories
  - 15 provincial key laboratories
  - 10 campus research institutions
  - 200+ scientific research projects of both national and provincial levels
  - 5 national scientific research awards
- “Efficient Abridged Embedded Spinning Technology and Its Industrialization” won the First Prize for National Science and Progress Award.
- “Excellent Quality Natural High Polymer Material Superfine Power Handing and Its High Value-Added Recycling” won the 2<sup>nd</sup> Prize for National Technology Invention Award.
- “The Recycling Use of Textile Printing and Dyeing Waste Water by Catalytic Oxidation Through Employing Microwave Infinite Ultraviolet Light” won the 2<sup>nd</sup> Prize for National Technology Invention Award.
- “Exploration and Application of the Complete Set Technology for Poly Phenylene Sulfide (PPS) Fiber Industrialization” won the 2<sup>nd</sup> Prize for National Science and Progress Award.
- “High-performance Industrial Yarn Energy-saving Twisting Preparation Technology and Equipment and Its Industrialization” won the 2<sup>nd</sup> Prize of National Science and Technology Progress in 2020.

## Study at Wuhan Textile University, Embrace Your Future

The WTU teaching staff is made up of a well-balanced quality team. We also employ various foreign and domestic scholars as adjunct professors in their respective fields of expertise. We always put students in the most significant position of everything we do, pay more attention to the cultivation of students' practical ability of creative power, and give them the best opportunities for brilliant future.

**WTU is known for providing a high quality, student-oriented education in a multi-disciplinary environment that integrates engineering, science, arts, economics and management.** Our dynamic specialized courses from 20 schools, advanced facilities, first-rate staff put forth all our efforts into molding students with coordinated development in terms of knowledge & competence. We have rated excellence by the Chinese Ministry of Education in the education evaluation over 20 years.

**International Education College (IEC)** is the big warm family for all international students study at WTU. **Till now, over 1000 international students studied here and became excellent international talents** to support thousands of jobs in the area of government, scientific research institute, and large enterprise in the world. The **courses** with the theme of **“Approaching China & Wuhan”** and all sorts of activities designed by IEC will take you to the charming wonderland with traditional culture & modern fashion.

No matter where are you from, we confirm believe you could find out your interests and hobbies here. Because the transnational love is our common language, and the multi-cultural harmonious environment of WTU will promote to make your dreams come true here! Welcome to Wuhan Textile University, a wonderful & amazing place to live and learn.

**The Programs you could choose to study at WTU  
(Two Years Master's Degree Taught in English)**

<b>School</b>	<b>Program</b>	<b>Research Directions</b>
School of Textile Science and Engineering	Materials and Chemical Engineering	textile engineering
School of Chemistry	Materials and Chemical Engineering	organic chemistry, physical chemistry
School of Environmental Engineering	Environmental Science and Engineering	environmental science and engineering
	Materials and Chemical Engineering	water pollution control solid waste treatment and recycling
School of Materials Science and Engineering	Materials and Chemical Engineering	functional polymer materials
School of Technical Research	Materials and Chemical Engineering	new fiber materials, intelligent textiles, industrial fiber products
School of Fashion	Art Design	fashion design
School of Art and Design	Art Design	art design and creation
School of Mathematics and Computer Science	Electronic Information	software engineering
	Computer Science and Technology	big data and artificial intelligence
School of Electronics and Electrical Engineering	Electronic Information	communication engineering
School of Management	Engineering Management	logistic engineering and management
	Business Administration	human resources marketing management business management

School of Mechanical Engineering and Automation	Mechanics	mechanical engineering
School of Accounting	Professional Accounting	professional accounting

### **Application Procedure**

1. Online Application  
Create account in the Online Application System  
(<https://wtu.17gz.org/>)
2. Comprehensive Evaluation  
Application submitted with all information correct will be reviewed by Wuhan Textile University to verify the identity, educational background and other supporting materials; an interview is required for graduate programs
3. Rejected or Accepted
4. If you are accepted, you will be enrolled at WTU and formal Admission Notice and JW202 will be issued by the university
5. Apply for Visa of X Type
6. Study at WTU
